PROFESSIONAL SUMMARY

Senior mobile engineer with **8 years** designing, building, and shipping iOS and cross-platform applications end to end — from architecture through App Store / Play Store release and production support. Expert in Swift, Objective-C, and the Apple ecosystem (UIKit, SwiftUI, RoomPlan/LiDAR, VisionKit, SpriteKit, SceneKit), now leading cross-platform **React Native** development. Proven across consumer apps with **10M+ downloads** — including **Reliance Jio and QVC (US retail)** — and complex B2B products, with **2+ years in lead roles across cross-functional teams of up to 20** (iOS, Android, QA, UI/UX). Strong in client and stakeholder communication, technical hiring and interviewing, and turning business goals into reliable, high-performance products.

TECHNICAL SKILLS

Languages: Swift, Objective-C, TypeScript, JavaScript, C, C++

Mobile & UI: iOS (UIKit, SwiftUI), React Native (cross-platform iOS + Android), Auto Layout, Storyboards & XIBs, RoomPlan/LiDAR, SpriteKit, SceneKit, VisionKit

Imaging & Data: USDZ / ESX / DXF export, custom PDF generation, OCR (VisionKit & AWS Textract), QR generation & scanning, offline data sync, push notifications

APIs, Backend & Security: RESTful APIs, GraphQL, Firebase (Realtime DB, Crashlytics, Cloud Messaging), AWS; Face ID / Touch ID, Sign in with Apple / Google / Facebook, biometric auth, KYC

Release & Quality: App Store Connect, TestFlight, code signing & provisioning, CI/CD (Jenkins), Instruments, crash analytics, performance optimization, unit testing, Agile / Scrum

Architecture & Leadership: MVVM, MVC, Coordinator pattern, Swift Concurrency (async/await), GCD & multithreading, modular/reusable code, code reviews; team leadership & mentoring, technical interviewing & hiring, sprint planning, cross-functional coordination, client & stakeholder management

Tools: Xcode, VS Code, Git, GitHub, Bitbucket, Jira, Confluence, Figma, Zeplin, InVision, Postman, Slack, Branch.io, Google AdMob, Claude Code (AI-assisted development)

PROFESSIONAL EXPERIENCE

Gsource Technologies — Pune, India

Feb 2025 - Present

Senior Software Developer · Mobile Lead

- As mobile platform lead, own architecture, technical direction, and delivery across the company's iOS and cross-platform products; drive technical interviewing and hiring for the mobile team.
- Lead development of a cross-platform (**iOS & Android**) **React Native** (TypeScript) application for the U.S. land-surveying market — high-fidelity Apple Pencil sketching with pressure-sensitive, spline-smoothed strokes, and per-layer **DXF export** feeding directly into the AutoCAD drafting workflow.
- Architected the drawing engine — MVVM + Coordinator with Command-pattern undo/redo — to handle large rural surveys (5+ acres, 500+ vertices) without frame drops.
- Built AR-based exterior scanning — ARKit boundary detection, CoreML object classification, and a live 2D mini-map — converting AR captures into editable survey documents.
- Designed and built the **Mapperty Claims iOS app from scratch** (Swift, Objective-C), turning LiDAR/RoomPlan scans into precise 2D/3D floor plans via SpriteKit, SceneKit, and UIKit.
- Delivered room measurements, floor-plan generation, and ESX/USDZ export for insurance assessments, with reliable offline capture and backend sync.

Freelance iOS Engineer — Remote

Aug 2024 - Feb 2025

iOS Engineer

- Re-engaged directly by the client behind the appointment-booking apps **QCrash & QCrash Pro** (50K+ installs on Google Play) to fix production bugs and ship new features, working independently with minimal direction.
- Diagnosed and fixed production bugs and performance issues, and refactored legacy code for maintainability and scalability.
- Added multilingual / localization support and improved QR-code check-in accuracy and speed, aligning the UI with Apple's Human Interface Guidelines.
- Owned full App Store delivery — provisioning, code signing, App Store Connect, and TestFlight — turning client feedback into shipped updates.

Reliance Jio (via NeoAstra Systems) — Mumbai, India (vendor closed) Jun 2023 - Jul 2024

iOS Tech Lead

- Delivered features for flagship Jio consumer apps — **JioHome (10M+ downloads)**, **JioPhotos (100K+)**, and **JioSnap** — collaborating across product, design, and QA.
- Integrated VisionKit for advanced face detection and camera input processing, and built QR-driven, event-based interactions in JioSnap.
- Built media playback and file-sharing in JioHome, and secure photo storage and organization in JioPhotos.
- Owned App Store release management — build configuration, versioning, TestFlight, and crash monitoring — for stable, on-time releases.
- Interviewed and evaluated **engineering candidates to grow the iOS team**.

Navneet Education — Mumbai, India (tech division closed)

Dec 2022 - May 2023

iOS Developer

- Built interactive, gamified learning modules for Leapbridge Kids (ages 3–6) in Swift and Objective-C, with rich animation and feedback.
- Optimized performance for low-end devices and followed child-safety and accessibility best practices, partnering with QA and content teams on compliant releases.

ITC Infotech India Ltd. — Pune, India (client project concluded)

Jan 2022 - Dec 2022

Associate IT Consultant

- Built and maintained key modules of the **QVC iOS shopping app (4.8/5 on the App Store, 1M+ downloads on Google Play)** within a **6-member international team**, delivering a multilingual, geolocation-based retail experience.
- Implemented localized content, secure login, product catalog, and cart features using MVC, with sound concurrency and memory management.
- Partnered with backend, UI/UX, and QA teams through sprint planning, bug triage, and continuous integration.

Incrust Software Pvt. Ltd. — Pune, India

Oct 2020 - Jan 2022

Software Developer (iOS)

- Built data-driven iOS apps with GraphQL, Firebase, and OCR, focused on performance and scalability.
- Implemented OCR via VisionKit and AWS Textract, Face ID / biometric authentication, QR scanning, custom PDF generation, and appointment scheduling.
- Delivered QCrash / QCrash Pro and **MatchedFX** — a digital-currency exchange with secure KYC and transaction handling — ensuring App Store readiness.
- Fixed 12+ memory leaks with Xcode Instruments (Leaks, Allocations), cutting memory usage by ~30%, and shipped 10+ App Store releases enforcing a 98%+ crash-free (Crashlytics) release gate.

RSL Solution Pvt. Ltd. — Pune, India

Sep 2019 - Oct 2020

Team Lead · iOS Developer

- Promoted from iOS Developer to Team Lead; **coordinated a 15–20 member cross-functional group** (iOS, Android, QA, UI/UX) across healthcare, safety, and education projects.
- Owned planning, task allocation, code reviews, and delivery while staying hands-on in Swift / Objective-C.
- Translated client requirements into specs and managed delivery end to end, driving client satisfaction.
- Shipped ANI (nutrition & allergen analysis with QR scanning) and Safe T Net (geofencing-based safety communication).

Hands In Technology — Mumbai, India

Aug 2018 - Sep 2019

Junior iOS Developer

- Built and shipped iOS apps across education, e-commerce, and event domains in Objective-C and Swift, working directly with clients.
- Handled full App Store deployment (certificates, provisioning, app transfers) and built auth, QR, notifications, and media-gallery features.

EDUCATION

Bachelor of Engineering (B.E.) — Electronics & Telecommunication Engineering

North Maharashtra University, Jalgaon, Maharashtra, India · 2018

CERTIFICATIONS

iOS Development Certified Course — BitCode Technology, Pune
